AHEC has received funding for a supplement scholars project

There will be three preferred HRSA-defined areas to be the primary emphases of the Area Health Education Centers Program COVID project:

1. Screening, testing and treatment tools and protocols for COVID-19 related health care
2. Impact of the social determinants of health on the COVID-19 pandemic (e.g., stigma of positive patients and vulnerable populations such as the elderly, people of color, and rural populations)
3. Self-Care of Health Care Professions (Quadruple Aim)/Resiliency Training

The following are factors for student participation:

• One-year participation with a stipend ($1,000) and hours (80) is at the same annual level of the two-year AHEC Scholars Program
• Completion of an AHEC Scholars application customized for the AHEC Scholars-COVID applicants.
  - Undergraduate-level students are eligible for participation in the AHEC Scholars-COVID group through this application process and with the approval of an RHPP Director.
  - Submitted applications will be sent from Qualtrics to the RHPP Director for review and approval.
• AHEC Scholars already participating in the two year program are not eligible for simultaneous participation in the AHEC Scholars-COVID group
• Community immersion or in-person experiences will not be a component of the AHEC Scholars-COVID group due to the current student travel restrictions at all ABOR schools. There may be voluntary components at a later phase, subject to individual preferences and college/university limitations.
